Teacher Professional Learning Communities: Myths and Realities

AMT – PLENARY

FRIDAY 11:00 - 11:45 ROOM 7 (LIVE); ROOM 14 A/B (VIDEO CONFERENCE)

Teachers all over the world are demanding more professional development (PD) and in difficult economic times opportunities for PD are decreasing. One of the ways to overcome these constraints is to get teachers to participate in teacher professional learning communities (PLCs) to obtain the support they need. Research has shown that PLCs enhance the quality of teachers and they also have a positive impact on student achievement. However, on examining actual practice, there are several myths associated with PLCs. This presentation presents the current landscape of PD and PLCs and analyzes the gap between the theory and practice. The presenter proposes ways forward to bridge this gap.

New Competencies; Old Problems

TECH – PLENARY

SATURDAY 10:45 - 11:30 ROOM 7 (LIVE); ROOM 14 A/B (VIDEO CONFERENCE)

New technologies require new competencies, both for teachers and learners, but at the same time we need to guard against assuming that 'new' is always 'good'. Educational technology is a case in point. Despite little evidence to show that digital technology enhances language learning, the fever for new tools and apps continues unabated. Moreover, each innovation arrives garlanded with claims that are seldom if ever realised, such that the history of educational technology in the 20th century has been characterised as a continuous cycle of “hype, hope, and disappointment” (Selwyn 2011). To avoid disappointment, the vigilant teacher needs to ask the question: *What is the problem for which this technology is the solution?* In this talk I strip language learning down to 6 ‘problems’ and evaluate the solutions that technology offers.
