CLILOVE: Why Students and Teachers Like CLIL **Sharing Ideas and Experiences**

A SEMINAR with

M.A. ORTENZI and M.G. MAGLIONE

CLIL has been a challenging field of research since it developed in many European countries in the 1990s. The introduction of the CLIL approach in the new school curriculum reform makes it a crucial issue. In recent years, many teachers and students have been involved in CLIL projects and the results are encouraging. Students like CLIL and the activities carried on in some schools have demonstrated that their motivation and confidence in both the language and the subject have increased. Also teachers like CLIL because it offers an opportunity for professional development and makes lessons more interesting and engaging.

This seminar is going to give an overview of CLIL methodology and its positive effects as well as some useful examples, in particular in scientific subjects (Maths, Physics, Chemistry, Science).

The event is open to TESOL Italy members (teachers and principals). For those who are not TESOL Italy members for the current year, a free provisional membership card will be issued (conditions of this card will be explained onsite by the local group coordinator). All participants will receive a certificate of attendance.
