

“21st Century Skills: Problem Solving, Coaching Students in handling Everyday Conflicts”

Description:

Since school violence rate is getting high especially in the public sector, teachers should not only master how to teach the four skills but more importantly equipping learners with 21st century skills to resolve problems both inside and outside the school. This workshop will be of good help for teachers to get to know some effective tips about coaching their learners to handle everyday conflicts. We will work on the techniques and strategies that will support learners in resolving conflicts and then play scenarios for putting things into practice.
